

GigaTech Products' copper cables deliver exceptional data transmission and reliable performance. Available in custom lengths and jacket colors, they are designed to meet the specific requirements of any network. Each cable undergoes rigorous qualification and testing to ensure it meets the demands of high-performance technology environments. Manufactured with top-quality components, all products are backed by a Lifetime Warranty for long-term dependability.

GigaTech copper cables are well known for their superior quality and durability.

- All wiring is 100% copper core, allowing for maximum electrical conductivity.
- Increased frequency ratings, exceeding industry standard, provide for higher transfer rates.
- Slim flexible boots allow for easy installation and removal in tight panel and hardware installations
